If a company wants to order one of our core packages, contact me and proceed to order online through the secured PayPal order form.

Basically, this is how it works

- When you reach out to us about any of our services we will schedule a meeting with you or your decision making team.
- During this meeting we will ask a few questions to learn about your company, customers and competitors.
- After this initial meeting we'll begin additional research to learn more about your company and verify the information we received, it's only after this that we will devise a customized online marketing solution for you.
- We'll ensure that this solution is industry specific and is optimized to maximize your efficiencies.
- This leads us to a proposal in which we'll detail the most critical business problem, the solution, the objectives, project specifications, timelines, controls, pricing, agreements and any other supporting information.
- Once these are agreed to by both parties we will put our team to work on your project. We'll design strategies based on realistic ROI goals and then choose the tactics to achieve those goals.

BLOG COMMENT SERVICE +

The Importance of Relevant Comments on Your Site

The most important social elements of blogs and websites are comments. Not just any comments but relevant comments that provide feedback to a post, article, video or other content. Interesting comments added to your content will add “social buzz” to your site.

Sometimes the comments can even grow to be more interesting than the content itself! When people see relevant comments surrounding your content it will usually arouse their interest.

Comments are like magnets; they attract more comments over time creating a snowball effect.

This makes your site more popular not only in the eyes of web visitors, but also in the eyes of search engines like Google, Yahoo and Bing.

8 Benefits of Relevant Comments On Your Website

- 1 Traffic-Relevant comments from different people provide a fresh source of real unique traffic to your site.
- 2 SEO- Relevant comments are great for search engine optimization- especially being that many comments will naturally contain relevant keywords related to your content.

Real visitors on your site interacting with your content will naturally lower your bounce rate, improve time on site and all those other important user behavior metrics that are vital for good SEO.
- 3 Social Proof- Relevant comments add life to your content. They provide the social proof that people need to see to help them believe in your content.
- 4 Conversions-Relevant comments can increase your conversions-whether you want more sales, more leads or more followers. Especially from people who need a little convincing.
- 5 Traffic Rankings-Relevant comments from real visitors will help boost your traffic rankings if they come from different IPs.
- 6 Popularity-Relevant comments help build your online community and in turn increases your popularity. When people see a stream of interesting comments on your site they say, "Hey this is where it's at, I want to join in".
- 7 Added Value-Relevant comments add value to your content. Content with an empty comment box at the end looks real bad. When you add relevant comments your site will come to life.
- 8 Authority-A good steady stream of relevant comments on your site will position you as an authority in your field-not only in the eyes of Google but most importantly the people

Are you tired of spam and/or generic interaction on your blog post? I'm here to help.

I will write 20 quality comments based on your contents/articles description on your blog. Each one will be at least 50 words, unique and look genuine so it helps you to gain interest of users about article.

Also if you need Traffic to your website, I will manually post your Url to different sites of your choice.

What you will expect from me?

- **Best delivery time (2 days)**
- I will read 20 of your blog, FB and You Tube entries and leave 20 well written thoughtful comments.
- I will actually read each post! This boosts your "Time Spent on Site."
- I can also post using Facebook or any social media of your choice.
